

# CAMI

## The Diva Princess

**Age:** 12 weeks

**Sex:** Female

**Weight:** 9 lbs

**Breed:** Bull Dog-Lab Mix

---

### PERSONALITY

This darling pint sized diva can be super cute and adorable but don't let her good looks fool you... Cami is by far the most demanding pup out of her litter. In order to get your attention she will continue to bark louder and louder each time until you've picked her up or given her what she wants. Another tactic of hers is to latch onto the back of your pants leg so that it makes it harder for you to walk with her attached. Cami's innocent and sweet face will have you wrapped around her tail in no time especially when she snuggles into your neck falling asleep in your arms.

---

### HEALTH & GROOMING

As Cami and siblings are just now turning 12 weeks old they have already been given two sets of vaccinations as well as two dewormings. Still requiring one more deworming and their third booster vaccination Cami and siblings will also receive their initial annual rabies vaccine at 16 weeks. All of the puppies will be spayed and neutered by 6 months old, even those that were previously adopted due to an additional clause in the adoption contract. As for bathing and grooming Cami nor the others will require much maintenance. Since their parents breeds are both short hair maintaining cleanliness will require monthly baths and brushing.

---

### ABOUT THE OWNER

Born on April 4th the puppies were fully dependant on their momma up until recently when she weaned them completely leaving them to fend for themselves as they will need to do after getting adopted. Now 12 weeks old Cami has been socializing with various dogs, cats and people all of which she seems to do well around. Showing no signs of anxiety, aggression or fear Cami is well on her way to becoming the next puppy ready for her furever family and new home.
